- Scaling and creating learning communities

Finland is a leading country in education, workforce development, greening and digital innovation.

Finnish teachers from primary to university level take pride in being lifelong learners, actively developing their own teaching and innovation skills.

This course, based on the Finnish innovation and know-how, gives practical tools and support in introducing innovative learning approaches within one´s organization.

International participants will benchmark educational innovation, get support from other like-minded professionals and work on a practical innovation project within their own organization.

Successful participants will receive a globally recognized Certificate from Omnia, The Joint Authority of Education. Assessment is based on Finnish National Agency of Education standards.
